

KLIK Stik Wireless Screen Sharing Adapter

KB-301

KLIK Stik is the ideal upgrade to any screen in an office, meeting room, or anywhere else people meet to collaborate. Small and inexpensive, the KLIK Stik is easy to install and intuitive to use, allowing people to screen-share from PCs, Tablets and Smartphones, even without installing an app.

KLIK Stik is the smallest and most affordable way to add professional-grade wireless screen sharing to any display or projector. Don't let its small size and low price suggest that this is a consumer streaming solution, KLIK Stik allows streaming from all PCs, Tablets and Smartphones, even without installing an app.

Installation is simple, and intuitive, with the KLIKWizard™ app. Just plug KLIK into your TV or projector, and run the app for a guided setup and connection to Wi-Fi. Once KLIK Stik is set up, start screen sharing from Windows, Mac, iOS, Android or Chromebook devices easily, and reliably. KLIK Stik supports full screen mirroring, allowing you to show all of what's on your screen.

With KLIK Stik, users can start screen sharing with AirPlay (Apple devices) or Miracast (Windows/Android), without installing an app. PC users can also use the KLIKConnect app for Mac, Windows and Chrome OS, to gain valuable features and deliver a consistent user experience. KLIKConnect also adds password-restricted access, moderator-controlled meetings and on-screen annotation.

Key Features

- Supports full screen mirroring from Windows, Mac, iOS, Android & Chromebook devices
- Use AirPlay or Miracast (Windows/Android) to screen share without installing an app
- Supports Open Access, Password Access & Moderated Access operating modes
- Simple installation and setup using the KLIKWizard setup automation app
- Connects to any screen or projector using HDMI and is powered by USB
- Select from supplied images, or upload your own, for custom screen wallpapers

Additional KLIK Stik Features

Open Access

For organizations with only a few screens and frequent guests, KLIK offers Open Access operation, that requires no app installation. In open access mode, users connect from Windows, Mac, iOS and Android devices using the native streaming utilities in those operating systems. With full AirPlay 2 and Miracast support, KLIK lets users stream without installing an app on their device.

Password Access

In organizations where multiple screens are fitted with KLIK devices, it's important to keep users from inadvertently connecting to the wrong screen. KLIK manages user access by displaying a password on the standby screen, that users need to enter in order to get connected, preventing disruptions.

KLIKStream

It's not always easy to see the screen, especially in a big classroom or conference room, so KLIK includes the KLIKStream remote viewing feature. Simply launch a browser and view the presentation, right on your own screen; PCs, tablets and smartphones are all included. And, forget note-taking, because KLIKStream allows you to capture and save images of the presentation for later review.

Media Player

KLIK includes a fully-featured Media Player that delivers HD-quality video playback from a variety of digital video formats. Simply plug in a thumb drive with Video, Audio or Image files, then play them back on the screen sequentially or in random order.

USB Remote

The best way to move your presentation along is by using a wireless presentation remote, and KLIK makes it easier than ever to share a remote among presenters. Simply plug the remote, or any keyboard, mouse or pointing device into the KLIK, and it will control the PC that's streaming to it.

Moderated Access

In an environment where multiple presenters need to be cycled rapidly through the presentation system, KLIK allows the appointment of a Moderator. The moderator then controls who has access to the screen, by initiating screen sharing sessions as needed. For added confidence, the moderator can preview a user's screen to verify content, before making their screen live.

Annotator

KLIK boosts collaboration by including an on-screen annotation feature inside the KLIKConnect app for Windows and Mac. The annotator includes pens and highlighters, with selectable widths and colors, to make markups over top of the shared screen contents. Plus, annotator includes the ability to add shapes and text, then allows saving or printing the resulting composite image.

Whiteboard

Jump into a brainstorming session whenever the inspiration strikes you, with KLIK's Whiteboard feature. Similar to the Annotator, whiteboard allows you to draw, type and mark up on a traditional white surface. Save and share your notes, or switch between your desktop and the whiteboard at any time.

Please visit www.klikboks.com for a complete list of the KLIK Stik feature set.

Warranty

KLIK Stik is warranted against defects in workmanship and materials for a period of 3 Years from date of purchase by the consumer.
